Good afternoon Mrs. [REDACTED]

Thank you for your time and the opportunity to speak to you and answer your questions this afternoon. As we indicated on the call, if you have any neighbors or other community members with questions – please do not hesitate to pass along our information. In the future if there are any additional questions that we can assist you with, please do not hesitate to contact us further.

Subject: EPA SESD Surface Water, Sump Water, Soil Sampling Report and EPAletter

Dear Mr. [redacted],

EPA mailed to you and your neighbors yesterday a hard copy of SESD sampling results from sampling performed on January 31, 2017. EPA plans to return for another round of sump water and ditch water sampling in June.

Just to emphasize that even though the 12DCA exceeds a screening level the 1,2-DCA concentrations in your home are within the acceptable risk range for prolonged exposure. Our next public information session will have our risk assessor attending the meeting.

Please see the enclosed report and letter and ATSDR fact sheet. Also I am including a professional paper on a study performed to determine why 1,2-DCA is often a background constituent inside homes. While 1,2-DCA has been phased out of many products manufactured in the US we receive products from foreign countries (e.g. China) that do not have the same concerns about the health effects of hazardous chemicals as American and European countries. I have been trying to determine

what household product brands may have 1,2-DCA. Low levels have been identified in the groundwater and ditch water.

You previously mentioned that during October 2016 your home was being painted. What type of paint (latex, oil based?) and what brand did you use? Did you do any staining or varnishing or stripping furniture during painting or after before the air study? If so, what brands did you use?

Sincerely,

James H. Smith

Subject: List of Questions Transcribed from Caleb.docx

All

please find a summary of the questions that Caleb shared this evening during the conference call that Brian H. and I had with him from 8-9pm. Caleb has been designated as the community's spokesperson. Caleb compiled the list and read the questions exactly like he received them (which he stressed during the call). The call went well. I believe Caleb understood why we could not participate in their meeting on Thursday. He believed that he might have at least 20 participants or more tomorrow evening.

We also discussed different methods for providing responses to him which included a call on tomorrow afternoon to respond, Caleb posting the link from WKBO's website (Q&A) on the community's facebook page; and EPA sending copies of a Q&A document overnight via Fed Ex. Let's work on the best plan for providing/coordinating a response.

Ksn

Questions from Caleb (Compiled from the community)

1. Have there ever been any fines imposed on Campbell Hausfeld?
2. Why is it still a problem?
3. Why have they (Campbell Hausfeld) not been held accountable for contaminating the groundwater?

4. Why haven't they been made to stop the problem?
5. Why haven't they cleaned it up?
6. Why can't our families walk in or let our kids play in the yard?
7. Why can't we have a garden?
8. Warren Buffett said "put the families first and get it cleaned up", why hasn't that happened?
9. April 4th, they were given 40 days to make a decision, what has been decided?
(Reference to Jim that he stated tha a ditch could be dug or neutralizers could be used in the groundwater)
10. Why did they leave early when the news media arrived in the neighborhood?
11. Why hasn't EPA been back (in the field or held a public meeting)?
12. Why can't we get an answer on the report that they have been doing the past two months?
13. Why do we have to live this way?
14. Why should we have to lose money from the value of our homes when they should be doing more to fix things?
15. Are there any more homes affected by this where the testing has been done?
16. EPA was supposed to have a meeting in January. What happened?
17. Why haven't we heard any new results?
18. Should we take precaution on Kiper Street, Kelly Street, or Asbury Street?

Good evening. Thank you very much for attending the public information session that the Kentucky Department Environmental Protection (KDEP) and the U.S. Environmental Protection (EPA) sponsored in Leitchfield on November 3, 2016 at Wilkey Elementary School. As promised the other night, I am attaching the materials shared that evening, namely:

- The 2 Fact Sheets for each facility
- The 2 presentations given by the technical project managers, Christopher Jung (KDEP) and James Smith (EPA)

Again, we really appreciate you attending our evening session held last week for the first time. We look forward to working with you to keep you informed, educated and abreast of the environmental assessment and corrective action activities for both of these facilities that are being regulated by our two agencies. We welcome your input and feedback, as we conduct our community engagement activities. As a reminder, EPA left a copy of a CD with many informative documents pertaining to Campbell Hausfeld (e.g., reports, Orders, sampling results) at the Grayson County Library for your review; we will strive to keep this local information repository updated.

Please do not hesitate to reach out to myself or the other agency contacts listed on the fact sheets, Thank you.

[REDACTED]

Good morning. Thanks for your email last night. I meant to call you yesterday to give you a heads up on this sampling event, but forgot. I am coming off of a vacation last week and am catching up on lots of things.

FYI it's my current understanding that Jim Smith, our EPA Technical Project Manager is working with our EPA Science and Ecosystem Support Division (our environmental sampling crew) in the field there this week. I believe their objective is to continue EPA's sampling investigation for the neighborhood ditch network on Floyd Street near the facility. I believe the facility's environmental consultant is also sampling alongside our EPA team. Per our last conference call, we brought you up to speed on EPA's ditch sampling effort earlier in the year.

Feel free to go over and ask Jim or others any questions you might have. Our current intention is to: better assess the nature and extent of any contamination that these ditches may potentially have (note that EPA will have to wait for these environmental laboratory results); consult with our EPA risk assessors; and then do some outreach, such as distribute a fact sheet to update the broader community. I hear your suggestion for a meeting; I will present this to our EPA site team for the Campbell Hausfeld facility.

I can be reached at my work cell 404-821-0697 at any time if you've got any further comments or questions at all. Thank you for reaching out to EPA.

EPA believes these are not related in any way to environmental work. EPA believes these “Marshalling” signs are a merely a directional tool for truck drivers to pick up loads or drop off loads at their facility, or for trucks to temporarily stage/park before arriving at another destination. See a link I found, that speaks to this issue,

Right. Well, to me, having an SSS memo is a good thing to have for our files, for CYA. We can cite from this for our draft fact sheet, or at least have this SSS memo as a springboard for writing a draft fact sheet for CE purposes.

I agree to share some information with these residents before they get our formal data results letters --- if I had kids there I would appreciate knowing, versus not knowing, despite the fact it apparently is in the very low risk range. Brian

Jim:

Sounds reasonable. FYI, you may have heard that we had a meeting with SSS after you left for Mexico and they want us to be careful not to alarm the residents, since the ditch findings were reportedly within our EPA risk range, per Kevin and Glen. As such, we made a collective decision, not to call the residents about the findings. SSS did not have a risk memo completed when they met with Meredith, Mike, Keriema and myself last month.

Glad you are reaching out to Ms. Puckett, Public Works Director. From our sign-in sheet in November --- **Ms. Sheila Pickett's contact info is 270-259-4034 (work) and [REDACTED] (home).**

Safe travels then. If I may ask, when is your field work starting, Tuesday to Thursday? Take care now. Brian

Brian,

We are targeting same homes.

I am getting confirmation from Meredith that funding is available for SEDS to take samples. If not I will ask CH to sample although I think it be best from a CE stand point if EPA conducts the sampling. I don't know when the sampling will take place.

I will see about contacting the C contacts. When you perform oversight there is not enough time to do much else. If they come by I will talk to the them.

I will let the residents know the ditch water is impacted and to keep their kids out of the water. Also, I need to contact Sheila Puckett and let her the ditch water is impacted so she can have City workers wear the appropriate PPE.

I wrote a letter to her yesterday.

Thank,
Jim

Cc: Anderson, Meredith <Anderson.Meredith@epa.gov>; Newman, Keriema <Newman.Keriema@epa.gov>
Subject: RESPONSE: Campbell Hausfeld Developments

Jim:

Good morning. Ditto on my end also. Sounds like a good overall plan. Appreciate your through outline. A couple of questions:

- So can I gather that CH already shared their long-awaited VI sampling results from the 4 homes sampled in Nov and late Jan. to you already. I am happy to hear that there does not appear to be a threat issue. Could you forward that report?
- Also, curious what homes they are targeting for VI next week – same homes or new additional homes? Will they be planning to do a chemical cleanout before the sampling this time?
- Lastly, do you know if an expanded ditch sampling effort will be undertaken and about when?

We look forward to seeing the draft letters. After they are out the door, we were thinking because of the high public interest, it may be a good idea to summarize the latest VI sampling, sump/pump and ditch sampling into a Fact Sheet for later local distribution this month, May or early June.

FYI more on the CE topic. I called [REDACTED], and spoke to her husband [REDACTED] while you were out, since they wanted an EPA response (see emails pasted below). Did that to let them know EPA was waiting for the residential VI results from CH and an EPA risk assessor's full evaluation of the ditch sampling results. Ken appreciated EPA's call letting them know the latest developments. That family, although living uphill, is

apparently involved in the local community group and are concerned. If you have time to speak with the [REDACTED], at least to tell them that a Fact Sheet may be planned— that discussion have real benefits. Their contact info is [REDACTED] Floyd Street, [REDACTED] and [REDACTED] *If you don't have time so be it, but they might see you first and ask questions.*

Also don't forget to recall that [REDACTED], one of the community group leaders may likely see you & stop by to chat, he lives on Kelly St and is at [REDACTED] --- keeping him in the loop while you are in the field would be very beneficial to our EPA-community relationship as well.

Thanks. Brian

Hi team,

I will be conducting oversight at CH next week of their semi-annual GW sampling event and the next indoor air VI sampling.

I will be in touch with each resident and I will let them know that the ditch water is impacted and the degree and that they will be formally notified.

I have written letters to the home owners describing the ditch water, sump water and soil sampling results and risk conclusions. As soon as I hear back from my risk assessor and make any revisions I will let you look at the letters.

Likewise I have written the City and will be transmitting the SESD memo and the IMWP request letter. A heads up CH may be conducting activities that affect the ditches. Also that their workers

The indoor VI information and EPA analysis will need to go out in a separate letter. CH is hand delivering the VI sample results next week. Our VI will be of a similar format sent out in the past for consistency. I am waiting to hear back on the risk assessment on the indoor air. Good news it does appear to be a threat issue to the residents.

Thanks,

Jim

Subject: Citizen Request for Info: Sharing Materials Used at Environmental Public Information Session (11/3/16) at Wilkey Elementary School - Update on Bosch Facility and Campbell Hausfeld Facility (by KDEP and US EPA)

Importance: High

FYI. See below. Folks, let's talk about getting Ms. [REDACTED] decent response on EPA's sampling activities from late October/November and the recent SEDS sampling (at least our status of evaluating the results). It might be easier to have a conference call in the short term – I will research her phone number.

We need to likely compile both sampling events into a Fact Sheet, fairly soon (after SSS risk assessors have given us their SESD sampling evaluation for the ditches and sump pumps) – for the sake of transparency to the community. It has been now 4 months since we had our first presence there. The last time I heard from [REDACTED] was in December, but she likely represents more folks in the community in her desire for more information on what EPA has found or has plans to do.

Ideas, please let me know. Thanks. Brian

Just wanted to let u know, that I know longer own the house at [REDACTED] Floyd Street in Leitchfield. I sold it to Mr. [REDACTED] I don't know his address, because he bought my house for a rental property. I do have his phone number and it is [REDACTED] He knows about all the sampling that you all have been doing, because I felt like I should tell him before he bought it. [REDACTED]

On Thu, Jul 27, 2017 at 2:37 PM, Smith, Jim <Smith.JamesH@epa.gov> wrote:

Dear Mr. [REDACTED],

Please see the attached report from SESD and EPA's letter. A hard copy of the letter and report are on the way to you. Chemical concentrations detected in the ditch are within EPA's acceptable risk range and there is no imminent threat of exposure to surface water or to inhalation of indoor air. As you are aware EPA required Campbell Hausfeld to submit an engineering solution to preventing exposure to surface water and controlling groundwater migration. EPA and Campbell will be contacting you soon to discuss environmental issues and solutions.

Sincerely,

James H. Smith

On Mon, Jul 24, 2017 at 11:04 AM Smith, Jim <Smith.JamesH@epa.gov> wrote:

Dear [REDACTED]

EPA will be sending out letters to you and your neighbors regarding the analytical results of EPA's most recent surface water and sump water sampling this week.

In addition, Campbell Hausfeld, EPA, and State of Kentucky are working together on an Interim Measures Work Plan to control exposure to surface water in the ditches, prevent offsite migration of groundwater contamination and mitigation of impacted water in the ditches. It is the intention of EPA, Kentucky and Campbell Hausfeld to expedite remediation of this problem. There are a lot of engineering details we are currently working on. Once we have an approved work plan we will share the plan for Floyd Street.

Sincerely,

James H. Smith

On Nov 10, 2016, at 7:03 PM, Holtzclaw, Brian <Holtzclaw.Brian@epa.gov> wrote:

Good evening. Thank you very much for attending the public information session that the Kentucky Department Environmental Protection (KDEP) and the U.S. Environmental Protection (EPA) sponsored in Leitchfield on November 3, 2016 at Wilkey Elementary School. As promised the other night, I am attaching the materials shared that evening, namely:

- The 2 Fact Sheets for each facility
- The 2 presentations given by the technical project managers, Christopher Jung (KDEP) and James Smith (EPA)

Again, we really appreciate you attending our evening session held last week for the first time. We look forward to working with you to keep you informed, educated and abreast of the environmental assessment and corrective action activities for both of these facilities that are being regulated by our two agencies.

We welcome your input and feedback, as we conduct our community engagement activities. As a reminder, EPA left a copy of a CD with many informative documents pertaining to Campbell Hausfeld (e.g., reports, Orders, sampling results) at the Grayson County Library for your review; we will strive to keep this local information repository updated.

Please do not hesitate to reach out to myself or the other agency contacts listed on the fact sheets, Thank you.

Mrs. [REDACTED]

EPA believes these are not related in any way to environmental work. EPA believes these “Marshalling” signs are a merely a directional tool for truck drivers to pick up loads or drop off loads at their facility, or for trucks to temporarily stage/park before arriving at another destination. See a link I found, that speaks to this issue, http://www.sydneyports.com.au/_data/assets/pdf_file/0009/17748/TMA_Driver_Induction_22_June_2012.pdf

Subject: WBKO Stories on Campbell Hausfeld and more

Bart:

Thanks for being a part of today's phone call with our site team. Please pardon us for not forwarding this information on before. Here's the two recent WBKO (Bowling Green) news stories:

First Story (June 19)

<http://www.wbko.com/content/news/Leitchfield-residents-concerned-about-possible-groundwater-contamination-429489223.html>

Second Story (June 21)

<http://www.wbko.com/content/news/UPDATE-Leitchfield-residents-concerned-about-possible-groundwater-contamination-430000513.html>

(In this news report, WBKO published EPA's response to eleven (11) reporter-based questions)

In response to a request from a local citizen, Mr. [REDACTED] that same week, as a team we filled out EPA responses to eighteen (18) community-based questions. We sent them in time for his June 29th local community group meeting. We also sent multiple hard copies in the mail. See attachment.

For everyone to have on hand, we're also attaching the last EPA fact sheet (from last November 2016, which got posted at WBKO's website), as well as Jim's PowerPoint from our last public information session. We look forward to KDEP's participation in Wednesday's call and our next joint information session in Leitchfield.

Subject: List of Questions Transcribed from Caleb.docx

All

please find a summary of the questions that Caleb shared this evening during the conference call that Brian H. and I had with him from 8-9pm. Caleb has been designated as the community's spokesperson. Caleb compiled the list and read the questions exactly like he received them (which he stressed during the call). The call went well. I believe Caleb understood why we could not participate in their meeting on Thursday. He believed that he might have at least 20 participants or more tomorrow evening.

We also discussed different methods for providing responses to him which included a call on tomorrow afternoon to respond, Caleb posting the link from WKBO's website (Q&A) on the community's facebook page; and EPA sending copies of a Q&A document overnight via Fed Ex. Let's work on the best plan for providing/coordinating a response.

Ksn

Questions from Caleb (Compiled from the community)

1. Have there ever been any fines imposed on Campbell Hausfeld?
2. Why is it still a problem?
3. Why have they (Campbell Hausfeld) not been held accountable for contaminating the groundwater?
4. Why haven't they been made to stop the problem?
5. Why haven't they cleaned it up?
6. Why can't our families walk in or let our kids play in the yard?

7. Why can't we have a garden?
8. Warren Buffett said "put the families first and get it cleaned up", why hasn't that happened?
9. April 4th, they were given 40 days to make a decision, what has been decided?
(Reference to Jim that he stated tha a ditch could be dug or neutralizers could be used in the groundwater)
10. Why did they leave early when the news media arrived in the neighborhood?
11. Why hasn't EPA been back (in the field or held a public meeting)?
12. Why can't we get an answer on the report that they have been doing the past two months?
13. Why do we have to live this way?
14. Why should we have to lose money from the value of our homes when they should be doing more to fix things?
15. Are there any more homes affected by this where the testing has been done?
16. EPA was supposed to have a meeting in January. What happened?
17. Why haven't we heard any new results?
18. Should we take precaution on Kiper Street, Kelly Street, or Asbury Street?

Ms. [REDACTED]

Good morning. Thanks for your email last night. I meant to call you yesterday to give you a heads up on this sampling event, but forgot. I am coming off of a vacation last week and am catching up on lots of things.

FYI it's my current understanding that Jim Smith, our EPA Technical Project Manager is working with our EPA Science and Ecosystem Support Division (our environmental sampling crew) in the field there this week. I believe their objective is to continue EPA's sampling investigation for the neighborhood ditch network on Floyd Street near the facility. I believe the facility's environmental consultant is also sampling alongside our EPA team. Per our last conference call, we brought you up to speed on EPA's ditch sampling effort earlier in the year.

Feel free to go over and ask Jim or others any questions you might have. Our current intention is to: better assess the nature and extent of any contamination that these ditches may potentially have (note that EPA will have to wait for these environmental laboratory results); consult with our EPA risk assessors; and then do some outreach, such as distribute a fact sheet to update the broader community. I hear your suggestion for a meeting; I will present this to our EPA site team for the Campbell Hausfeld facility.

I can be reached at my work cell 404-821-0697 at any time if you've got any further comments or questions at all. Thank you for reaching out to EPA.

Good evening. On my way home from work today, I noticed 3 white EPA vans. Would really like to be informed. Three local news channels will be here tonight due to a missing teenager found dead. They were also informed of the situation over here and would like a meeting. Could you let me know what is going on, please.

EPA believes these are not related in any way to environmental work. EPA believes these “Marshalling” signs are a merely a directional tool for truck drivers to pick up loads or drop off loads at their facility, or for trucks to temporarily stage/park before arriving at another destination. See a link I found, that speaks to this issue,

I am forwarding this email below from you -- to my technical project manager, Jim Smith. He will respond to you. I am not sure if he received the laboratory validated data or the report back yet from the neighborhood sampling event back in late October/November. He can provide you more current information than I can, so I am copying him on my interim response to you. Thanks for your inquiry. I can be reached at 404-821-0697. Brian Holtzclaw

I was wondering the update if the test results from the Kiper Subdivision neighborhood.

Good evening. Thank you very much for attending the public information session that the Kentucky Department Environmental Protection (KDEP) and the U.S. Environmental Protection (EPA) sponsored in Leitchfield on November 3, 2016 at Wilkey Elementary School. As promised the other night, I am attaching the materials shared that evening, namely:

- The 2 Fact Sheets for each facility
- The 2 presentations given by the technical project managers, Christopher Jung (KDEP) and James Smith (EPA)

Again, we really appreciate you attending our evening session held last week for the first time. We look forward to working with you to keep you informed, educated and abreast of the environmental assessment and corrective action activities for both of these facilities that are being regulated by our two agencies.

We welcome your input and feedback, as we conduct our community engagement activities. As a reminder, EPA left a copy of a CD with many informative documents pertaining to Campbell Hausfeld (e.g., reports, Orders, sampling results) at the Grayson County Library for your review; we will strive to keep this local information repository updated.

Please do not hesitate to reach out to myself or the other agency contacts listed on the fact sheets, Thank you.
